100% Partner Integration With A Single Platform

Seeburger supply chain integration solutions include:

Integrating the extended supply chain

100% trading partner integration:

The ability to communicate with trading partners of all sizes and from every point on the globe via enabling solutions that include EDI, XML, Web Forms and Portals, Paper-to-ERP, and Hub and Spoke systems.

Inventory Management Seeburger **Demand-Driven Inventory Management** Solution:

Supports a full range of inventory models, policies, and workflows including VMI, JIT, JIS, SMI, POU, KANBAN ensuring end-to-end planning, manufacturing, and replenishment can be synchronized with your customers, suppliers, logistics providers, regional carriers and freight forwarders.

Logistics Visibility Seeburger Logistics **Visibility Solution:**

Provides end-to-end visibility and information sharing on the flow of materials - from factory shipment through final delivery at the customer's site by automating and monitoring the entire logistics process, SEEBURGER'S Gateway solution includes RFID integration, ASN generation, Barcode Labeling and 3PL connectivity.

Enterprise Application Integration (EAI)

Focused end-to-end enterprise-wide system integration by integrating your ERP, WMS, CRM, and Business Intelligence Solutions across multiple plants and remote sites, you automate your business processes. Quality data visible across multiple systems allows you to manage your business accurately with greater organizational efficiency.

How Can We Help You?

Supply Chain Integration

Seeburger supply chain solutions can help you:

Increase Productivity

Through the reduction of purchase order costs and cycle times

Improve Inventory Management

By enabling you to reduce inventory levels, improve inventory turns and eliminate out-of-stock occurrences
