

SEEBURGER E-Invoicing Solution

SEEBURGER E-Invoicing Solution supports Ravensburger

With the SEEBURGER E-Invoicing Solution for SII in Spain, Ravensburger reports the sales tax information electronically to the Spanish tax office almost immediately after the underlying transaction occurred. The transfer takes place in a firmly defined XML format. The solution also covers the innovations of version 1.1 from the 1st of July 2018. This includes the updated AEAT XML format with additional fields and content as well as the new web services version for communication with the SII system.

“ The introduction and use of the SEEBURGER E-Invoicing Solution for SII in Spain succeeded ‚playfully‘ in the usual Ravensburger manner. The adaptations to the solution caused by the new version 1.1 of the SII system were also taken into account within a short period of time. ”

Markus Deiß, Head of Business Development and Process Analysis, Ravensburger AG
